

### **EAST PARK TOPICAL**

The Natural Solution for Skin Irritation\*

This product can be used for any skin problems such as cold sores, rashes, insect bites, etc. It should be applied to and around the affected area with a circular motion, working it well into the skin until absorbed. Each application should be accompanied with at least one East Park d-LENOLATE® capsule, with at least three (3) applications per day recommended

For those already taking East Park d-LENOLATE® capsules, there is no need to take more when applying the Topical.

NOTE: Because the Topical goes to work at the site of the application, it is likely that a die-off reaction may occur on that area. After a day or two of use, the site may actually appear to be getting worse – this is normal and even a desired reaction, as it shows the area is being purged of toxins. This reaction is similar to the Herxheimer Response some people experience when taking the capsules internally.

### **EAST PARK OLIVE LEAF EXTRACT CLEANSING BAR**

The most advanced product of its type. A natural adjunct to our East Park Topical, the East Park Cleansing Bar contains all the goodness of our d-LENOLATE® solution in a lathering bar form.

Use it to thoroughly cleanse and prepare affected areas before applying the East Park Topical. Although designed specifically to compliment our Topical, many customers find it wonderful for total body use. Try it as a facial bar – we know you will love it!

The East Park Cleansing Bar is no longer a secret. With many of the same effective ingredients contained in our other powerful products, this little topical “Wonder Bar” preps, soothes, and helps many skin problems. Many of our customers tell us that it is the best facial cleanser they have ever used, producing beautiful, smooth and healthy skin.

With all the “pretty, scented” soaps in every store in the country extolling great benefits and lasting results, how does our little “Wonder Bar” stack up?

It contains our patented extract of Olive Leaf that possesses anti-bacterial properties to prepare your skin for East Park Topical application and leave it fresh and soft. The bar has also been shown anecdotally to reduce and help wrinkles.
